2 I created a maven project and set up a webhook and the job run.

The top screenshot shows the Jenkins 'Console Output' for a build. The output text is as follows:

```
Started by GitHub push by akash7151
Running as SYSTEM
Building in workspace /var/lib/jenkins/workspace/Demo_Maven
The recommended git tool is: NONE
No credentials specified
Cloning the remote Git repository
Cloning repository https://github.com/akash7151/maketimecounttoday.git
> /usr/bin/git init /var/lib/jenkins/workspace/Demo_Maven # timeout=10
Fetching upstream changes from https://github.com/akash7151/maketimecounttoday.git
> /usr/bin/git --version # timeout=10
> git --version # 'git version 2.47.1'
> /usr/bin/git fetch --tags --force --progress -- https://github.com/akash7151/maketimecounttoday.git
+refs/heads/*:refs/remotes/origin/* # timeout=10
> /usr/bin/git config remote.origin.url https://github.com/akash7151/maketimecounttoday.git # timeout=10
> /usr/bin/git config --add remote.origin.fetch +refs/heads/*:refs/remotes/origin/* # timeout=10
Avoid second fetch
> /usr/bin/git rev-parse origin/dev^{commit} # timeout=10
Checking out Revision 5e543158b60032709ce41b87ae01ec10be022b14 (origin/dev)
> /usr/bin/git config core.sparsecheckout # timeout=10
```

The bottom screenshot shows the Jenkins 'Demo_Maven' job page. It includes a 'Test Result Trend' graph showing a single 'Passed' result, a list of 'Permalinks' for recent builds, and a sidebar with navigation options like 'Status', 'Changes', 'Workspace', and 'Build Now'.

I created a pipeline project and set up a webhook and the job run
